

Introduction to your practice FootFall website

FootFall is a way of connecting with your GP Practice online.

You can connect anywhere, anytime.. At home, or on the go!

Here's what you need to use FootFall.

You'll need a smartphone, tablet, laptop or desktop computer.

A good and stable internet connection.

Access to one of these supported browsers.

Chrome

Safari

Microsoft Edge

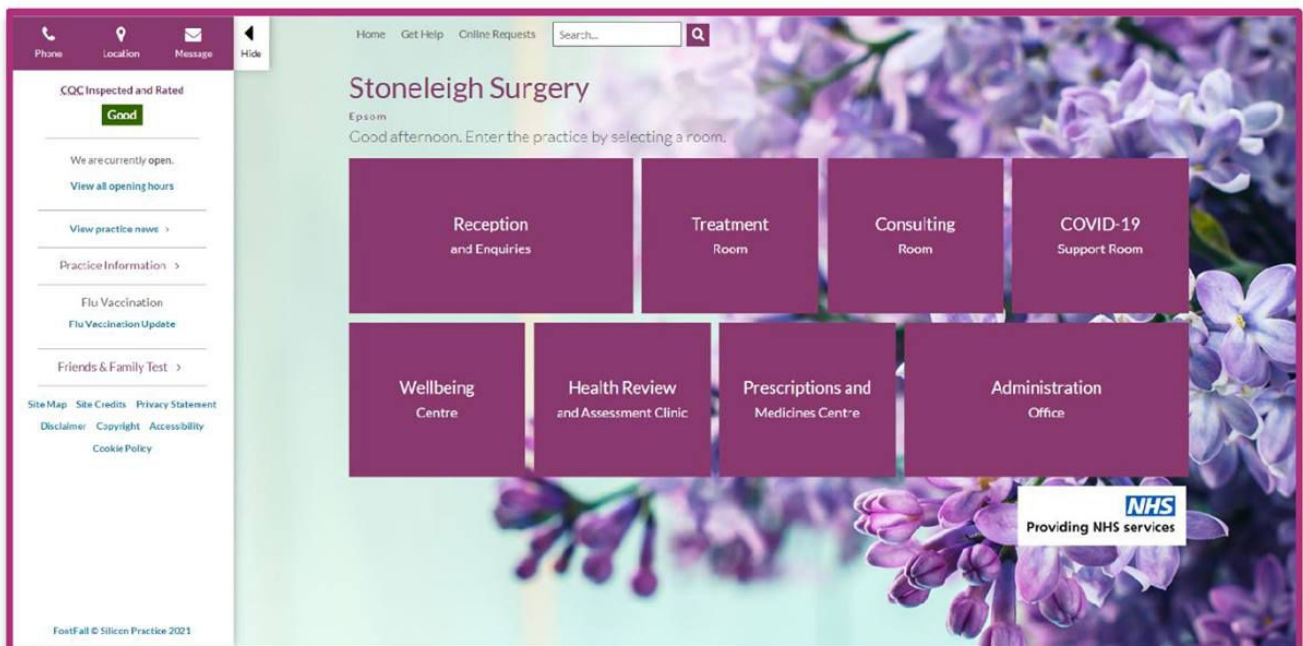

Firefox

Opera

When you visit your practice website, you'll find yourself on a webpage that looks similar to this...

This is your digital practice.

Your digital practice enables you to find out answers to your questions and submit requests online, directly to your practice.

These requests will ask you for specific information relating to your condition or query, just as the receptionist would if you called or visited the practice. This is so your practice can collect all the information they need to decide on the right care for you.

The boxes represent rooms that you would find in your physical practice. They are here to help and guide you through the website to find the right help and information.

The best way to navigate the digital practice website, is to think about where you would go in your GP practice to get help.
